PROFESSIONAL SUMMARY

Backend Developer and AI enthusiast skilled in building scalable applications using Python, FastAPI, and Machine Learning. Experienced in developing REST APIs, NLP-based systems, and data-driven solutions with a strong foundation in full-stack development and problem-solving.

EDUCATION

SRM Institute of Science and Technology

Aug 2023 – May 2027

Bachelor of Technology – Computer Science Engineering (Big Data Analytics), CGPA: 8.99

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript
- **Frameworks & Libraries:** FastAPI, Flask, React.js
- **Tools & Platforms:** Docker, Git, GitHub, Power BI
- **Databases:** MySQL

EXPERIENCE

AI Engineer Intern

Jan 2026 – Mar 2026

Upstride — Python, AI/ML

- Developed and evaluated AI/ML models for real-world applications using Python, improving model accuracy and performance by 20%.
- Built and optimized data preprocessing pipelines, increasing efficiency in production environments by 25%.
- Collaborated with cross-functional teams to integrate AI solutions into existing workflows, improving operational effectiveness.

Centre of Excellence

April 2026

SRM University — NLP, Python

- Selected by the Centre of Excellence to build and present Aviora, an AI-powered personalized learning platform.
- Engineered a mistake-aware chatbot using TF-IDF and Naive Bayes algorithms, improving query understanding accuracy by 90%.
- Implemented an adaptive recommendation system providing personalized explanations and study resources for learners.

PROJECTS

AVIORA — AI Personalized Learning Platform — Python, NLP, Streamlit, Machine Learning

- Built an AI-driven personalized learning platform utilizing Python, NLP, and Machine Learning technologies, improving personalized learning support efficiency by 35%.
- Engineered a mistake-aware chatbot using TF-IDF and Naive Bayes algorithms for topic identification and guidance.

SPORTIFY — Athlete Networking Platform — React.js, Flask, MySQL, REST APIs

- Created a networking platform for athletes using React.js, Flask, MySQL, and REST API integration.
- Integrated interactive dashboards for profile management and analytics visualization, improving user engagement by 30%.
- Achieved 90% chatbot query accuracy for real-time user support and communication.

Crop Disease Prediction System for Smart Agriculture — Python, Machine Learning, OpenCV

- Created an AI-based image classification system for crop disease detection using Python and Machine Learning, improving disease identification efficiency.
- Utilized OpenCV for image processing and feature extraction, improving disease detection accuracy by 15%.
- Enabled timely diagnosis and intervention for crop health management and smart agriculture support.

HACKATHONS & ACHIEVEMENTS

- Participated in 4 hackathons focused on AI-driven solutions, rapid prototyping, and real-world problem-solving.
- Built scalable full-stack and machine learning applications in collaborative team environments.
