Summary

Final -year Computer Science and Engineering undergraduate specializing in Big Data Analytics, with hands-on experience in Python, JavaScript, AI application development, and full-stack engineering. Experienced in building AI-powered learning applications, REST APIs, and web applications. Interested in Generative AI, LLM integration, software engineering, and developing reliable, practical technology solutions.

Education

SRM IST-Ramapuram

Aug 2023-May 2027

B.Tech · Computer Science and Engineering - Big Data Analytics 9.12/10

Vani Vidyalaya Senior Secondary and Junior College

Jan 2022 - Jan 2023

Class XII - CBSE · MPC 63.8%

Vani Vidyalaya Senior Secondary and Junior College

Jan 2020 - Jan 2021

Class X - CBSE · All subjects 85.8%

Skills

Programming Languages: Python, JavaScript, SQL
Core Computer Science: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Problem Solving
Frameworks & Libraries: React.js, Node.js, Express.js, Flask, FastAPI, Pandas, NumPy
AI & Generative AI: Machine Learning, Natural Language Processing (NLP), Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG)
Databases & Search: MySQL, MongoDB, Vector Search, , PostgreSQL
Software Development: REST APIs, API Integration, Debugging, Git, GitHub
Cloud & Data Analytics: AWS Cloud Foundations, Power BI, Excel

Experience

Upstride

Jan 2026 - Mar 2026

AI Engineer · Part-time

- Developed and evaluated AI/ML models using Python for real-world applications.
- Built and optimized data preprocessing workflows to improve model reliability and efficiency.

Excelencia

Sep 2026 – Nov 2026

AI Engineer · Part-time

- Contributing to the development of a context-engine application using Python and FastAPI, supporting backend API workflows.
- Working with data ingestion, search, embeddings, authentication, and PostgreSQL within a Docker-based development environment

Projects

JWT AUTHENTICATION & PROTECTED ROUTES

-

Full-Stack Web Development · React.js, Node.js, Express.js, MongoDB, JWT

- Built a full-stack authentication system with user signup, login, logout, password hashing, and JWT-based authentication.
- Implemented protected frontend and backend routes, MongoDB integration, and validation of authentication flows.

AVIORA — AI Personalized Learning Platform

-

Artificial Intelligence / EdTech · Python, NLP, Machine Learning

- Built an AI-driven personalized learning platform using Python, NLP, and Machine Learning for personalized learning support.
- Engineered a chatbot using TF-IDF and Naive Bayes for topic identification and user guidance.

MNEMO — AI-Powered Context Engine

-

AI & Backend Development · Python, FastAPI, PostgreSQL, Docker

- Contributing to backend API development using Python and FastAPI for a context-engine application
- Working with data ingestion, search, embeddings, authentication, and PostgreSQL in a Docker-based development environment.

Certifications

1st Prize – Aurex'26 Hackathon (LSM Track) | Research Paper Presentation – ICECT 2026 | AWS Academy Cloud Foundations | NPTEL DBMS
